Art Unit: 2834

***Allowable Subject Matter***

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art fails to show amplification portions in which said portions have a base section and a top section and they are connected at each of these sections, thereby having an opening between adjacent amplification portions, in a structure including an electromechanical energy converting element connected to the base portion and being driven to generate vibration in a vibration body that includes the base and amplification portions, which vibration ultimately moves a driven member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Direct inquiry to Examiner Dougherty at (571) 272-2022.
